Skyline's Seventh Annual Golf Classic Raises Record Total of \$94,000

The Skyline Charitable Foundation, officially established last year, launched in grand style on July 6th when it hosted the Seventh Annual Golf Classic at the **Village Club of Sands Point**. The all-day outing, followed by a cocktail party and dinner banquet, was a winner in every way, breaking records in funds raised and attendance. It brought in the remarkable sum of over \$94,000 for the organizations

The Skyline Restoration team welcomes the golf event participants, on July 6, at the Village Club of Sands Point. The funds raised will benefit Smile Train, St. Jude Children's Research Hospital, The New York City Center for Children and Wounded Warrior Project.

FIVE BOROUGHES

Over 43,000 Feet of Sidewalk Shedding Is Removed from NYCHA Developments

In recent weeks, **Mayor William De Blasio's** efforts to remove nearly 8 miles worth of scaffolding from completed or unattended construction projects around New York City public housing sectors are nearing the finish line. Since taking office in January 2014, De Blasio has received countless complaints from residents claiming that the scaffolding riddled across New York City's housing façades is not only an

eyesore, but also a vehicle for criminals to commit crimes in under the additional concealment provided by the "sidewalk sheds". As a result of the growing number of residents inhabiting public housing in New York City, with an estimated population greater than that of Atlanta, De Blasio saw the initiative as being an imperative step to maintaining the level of health, safety and happiness expected for all New York City residents. De Blasio was quoted saying that; "They've made life in developments worse. They've made people feel less safe and secure. And, in so many cases, it wasn't necessary – and that was the worst part." Further scaffold removal is expected to continue around New York City.

NYBF & NYBC Announced Competition to Design a Better Sidewalk Shed

The **New York Building Foundation** and the **New York Building Congress Task Force on Innovation and Best Practices** invite members of the design, construction, and real estate industry to participate in a competition to design an innovative alternative to the unsightly sidewalk sheds now employed throughout the City. The goal of the competition is to leverage the expertise and ingenuity of the building industry to develop preliminary shed design concepts that could meet New York City Department of Buildings requirements, while thoughtfully addressing a major quality of life issue for New Yorkers. The Building Foundation is asking participants to create shed design concepts that are suitable for new commercial construction in central business districts; new small- to mid-size residential and commercial projects; and Local Law 11 masonry repair work, particularly on older multi-story residential buildings with more limited budgets and design constraints.

For full details go to <http://www.nybuildingfoundation.org/>

Long Island City Summit, Priorities and Plans

With great thanks to the **Long Island City Partnership** and co-hosts **Modern Spaces** and the **Queens Courier, The Museum of the Moving Image** held the second annual **Long Island City Summit, Priorities and Plans**, on June 23, 2015 to discuss the dramatic changes happening across Long Island City's landscape. Hundreds of eager LIC supporters gathered to listen to some of NYC's most influential real estate figures, such as **Jamestown's** President **Michael Phillips**, NYC's **Department of Transportation** Deputy Commissioner **Ryan Russo**, **Crain's** Vice President & Publisher **Jill R. Kaplan**, **Hal Rosenbluth**, President of **Kaufman Astoria Studios**, and **Silvercup Studio's** CEO **Alan Suna**, discuss the future plans for the vibrant, yet modest city tucked in between Queens, Brooklyn and Manhattan. In recent years, LIC has proven itself as an increasingly exciting place for new residents and businesses to call home, while recently becoming an international travel destination for tourists' abroad. Excitement has spawned in LIC, but is certainly not limited to the small city that stands across the East River from Manhattan, as several plans are coming to fruition aimed at improving business accessibility, housing affordability, transportation, and tourism & culture.

Site Safety Plan (SSP) Submission/Façade Alteration: New Filing Option

NYC Buildings announced the following:

Professional applicants now have the option to file a Site Safety Plan (SSP) for typical façade alterations (restorations) as a professionally certified Alteration Type 3 (A3). Non-professional applicants will continue to submit filings to the BEST Squad for review.

Notable items:

1. The professionally certified A3 must be filed by a registered design professional, architect or engineer.
2. Any of the existing filing protocols (eFiling, Hub Self-Service, etc.) may be used.
3. Professionally certified A3 filings will not be subject to review by BEST Squad.
4. All standard fees applicable to an A3 filing will apply.
5. Plan content and format shall be in accordance with all applicable sections of Title 28 of the Administrative Code, Chapter 33 of the New York City Building Code, and with the related rules and regulations of the Department of Buildings.
6. Random audits of SSP A3 applications will review content.
7. Questions related to the content of SSPs or about this notice are to be directed to the Chief Plan Examiner of the BEST Squad.
8. Frequently Asked Questions:
http://www.nyc.gov/html/dob/downloads/pdf/ssp_facade_alt_professional_certification_faqs.pdf

Skyline Joins the National Safety Stand-Down To Prevent Falls In Construction

A Safety Stand-Down is a voluntary event for employers to talk directly to employees about safety. This Stand-Down focuses on "Fall Hazards" and reinforcing the importance of "Fall Prevention".

Skyline Restoration participated in the program and conducted a Safety Stand-Down by taking breaks at job sites to have a toolbox talk and another safety activities such as conducting safety equipment inspections, developing rescue plans, and discussing job specific hazards.

The purpose of the National Fall Prevention Stand-Down is to raise awareness of preventing fall hazards in construction. Fatalities caused by falls from elevation continue to be a leading cause of death for construction workers, accounting for 291 of the 828 construction fatalities recorded in 2013. Those deaths were preventable. Fall prevention safety standards were among the top 10 most frequently cited OSHA standards, during fiscal year 2014.

2015 Stand-Down Goals

Last year's Stand-Down was a tremendous success, reaching more than 1 million workers. This year, OSHA's goal was for more than 20,000 Stand-Downs involving more than 3 million workers that took place from May 4-15, 2015, having touched almost 4 out of 10 construction workers in the country.

PWC'S SALUTE TO WOMEN OF ACHIEVEMENT

New York, NY – “Since PWC launched its Salute to Women of Achievement in 2000, we have been proud to honor 79 remarkable women,” said **Barbara Armand**, president of **Professional Women in Construction (PWC)** and of **Armand Corp.**, as she introduced the honorees at the organization’s 15th annual Salute to Women of Achievement luncheon on Thursday, June 11, 2015 at The Yale Club in New York City. “I congratulate you all on your entry to the prestigious ranks of PWC’s Women of Achievement,” said Armand.

Honoree **Denise Berger**, assistant chief engineer/operations, **The Port Authority of NY & NJ (PANYNJ)**, thanked her mentors for helping her “navigate” and awards presenter **James Starace, P.E.**, deputy chief engineer/director, PANYNJ, for advice that continues to give her the “confidence and credibility” to forge ahead. Starace noted the immense scope of her responsibilities and said that Berger is a stellar mentor dedicated to “guiding the next generation of leaders.”

Honoree **Ellen Chasanoff**, project business manager, **HNTB Corporation**, spoke of the “privilege to have a wonderful team” where “everyone embraces the experience.” She thanked awards presenter **Joseph Lawton**, senior vice president/national construction management practice leader, HNTB Corporation, and said that she is “honored to represent women everywhere in a leadership role.” Lawton cheered her “incredible contribution on the CM and PM side,” and praised Chasanoff for being “proactive, listening well, and having passion in what she does.”

Honoree **Martine Duphrezin, RA**, principal, **RCGA Architects**, thanked PWC; awards presenter **Robert Gaskin, RA**, principal and CEO, RCGA Architects; and her family for their faith in her. She dedicated the award to her “parents who made everything possible.” Gaskin called Duphrezin an “excellent architect” and applauded

the great humanitarian initiatives she has devoted herself to.

Honoree **Eva Hatzaki**, director of marketing, **Skyline Restoration Inc.**, thanked awards presenter **John Kalafatis**, CEO, Skyline Restoration, and Skyline for giving her “the license to try, to dare, and to be bold”; her “amazing team”; and PWC, saying that because of its efforts “women today are greeted with far less skepticism and far more respect.” Kalafatis said that Hatzaki’s “determination, hard work, and creativity” have not only “helped our company grow, but helped our city to grow as well.” He added that she has bolstered “the industry and the women in the industry.”

Honoree **Catherine Rinaldi**, deputy executive director, **MetroNorth**, thanked awards presenter **Joseph Giuliatti**, president, MetroNorth, for recognizing that “in a world class city it is necessary to invest in the vitality of our transportation system.” Giuliatti pointed out his good fortune to have “someone of Cathy’s caliber to ensure that what needs to get done is accomplished.”

ENGINEER'S CORNER

Retaining Walls Need Maintaining Too

By Charles A. Merritt, PE, Merritt Engineering

While the 8th Cycle of Local Law 11/98 (FISP) is well underway, Building Owners and Managers in New York City should also be aware of another extremely important law, Local Law 37 of 2008, which requires the inspection, maintenance and repair of retaining walls.

We'll begin with the most important question – what is a retaining wall? Local Law 37 of 2008 classifies a retaining wall as a wall that resists lateral pressures and limits lateral displacement caused by soil, rock, water or other materials. It is important to note, however, that only building owners with retaining walls which are 10 feet high or greater and face a public right-of-way are subject to the requirements of Local Law 37 of 2008.

What are the filing deadlines?

The law established one year filing windows for each of the five boroughs of New York City. Inspections for properties in the Bronx were due in 2014, while Manhattan is up next in 2015, followed by Staten Island in

Continued on page 6

Retaining Walls Need Maintaining Too

Continued from page 5

2016, Queens in 2017 and Brooklyn in 2018. The inspection and submission must be performed by a Qualified Retaining Wall Inspector (QRWI) every five years.

What do Buildings Owners and Property Managers have to do?

You must hire a QRWI, typically a registered design professional (P.E. or R.A.), to conduct a hands-on, non-destructive inspection to determine the existing conditions of the retaining wall and identify potential safety hazards. Once the initial inspection is completed, the QRWI will prepare and file a written report with the New York City Department of Buildings (DOB) that details any necessary repair strategies.

How are the results of the assessment classified in the report?

The qualified professional will determine if the conditions are “Safe”, “Safe with Minor Repairs or Maintenance”, “Safe with Repairs and/or Engineering Monitoring”, or “Unsafe.”

A retaining wall or any part thereof that may pose a potential danger to persons or property, but does not require immediate action, may be rated “Safe with Repairs and/or Engineering Monitoring.” Partially collapsed walls are classified as “Unsafe” and must be addressed immediately.

When to Repair and when to Replace?

There are several factors that play a role in determining whether your building’s retaining wall requires repairs or replacement. Leaning or displaced segments of a retaining wall and cracks in stone are noticeable defects, but it is sometimes difficult to determine whether such defects can be repaired locally (i.e. partial replacement, stabilization with mechanical anchors, epoxy injections in cracks) or if the defects require demolition and re-construction of the entire retaining wall. If there is severe structural damage, such as a partial collapse of a wall section, then replacing the wall is the safest solution.

Is this something to incorporate in our building’s maintenance plan?

Absolutely! As your restoration and repair experts, we recommend that every building have a maintenance plan that includes frequent evaluations of all exterior elements including roofs, facades, sidewalks, parking lots, and any retaining walls. Focusing specifically on retaining walls, building staff should familiarize themselves with early indicators of problematic conditions such as loose or cracked mortar, water stains on the surface of the retaining wall, soil and vegetation growth in the joints, pockets of mud that form at the base of the wall, and clogged drain outlets that are sometimes found at the base of a wall.

Does the Retaining Wall report differ from a Local Law 11/98 (FISP) report?

Although there are similarities, such as visually inspecting the wall and observing its conditions, the QRWI must first design and implement an assessment program that is specific to the retaining wall to be assessed, including, but not limited to, observations, data collection and method of evaluation. The assessment program and methods to be employed must be based on the consideration of the wall construction type, wall function, year built, location and failure consequence. Consideration must be given to the retaining wall’s history of maintenance and repairs as described in previous reports and submittals to the DOB, if applicable. A typical report will outline information consisting of the approximate age of the retaining wall, the type of construction, any history of past repairs/replacement, any deficiencies noted (prioritizing from immediate to long term repairs), as well as recommendations and anticipated budgets for repairs outlined. The report will also be accompanied by photographs and field sketches of deficiency locations.

SKYLINE'S SEVENTH ANNUAL GOLF CLASSIC RAISES RECORD TOTAL

Continued from Page One

and causes supported through the tournament: **Smile Train, The New York Center for Children, Wounded Warrior Project, St. Jude Children's Research Hospital, and African Soul - American Heart (ASAH).**

Buoyed by sunny skies and high spirits, **Eva Hatzaki**, director of marketing for Skyline Restoration, had to admit –the energy was contagious.

"I've been hearing and seeing such amazing enthusiasm all day," said Eva, who has been heading the Skyline team in organizing the event since its debut in 2009. "Fortunately, we've always had an excellent turnout, but this year the response seems stronger than ever. Clearly there is magic in the air. It is so heartening to see this, especially after all the hard work my crew put in to make this happen – Best event ever!"

Skyline Restoration CEO **John Kalafatis** added: "This event offers an opportunity to give back to the community. We have established our role as a charitable organization. To see this reception is wonderful. We are so proud of the Skyline team and grateful to the people we do business with – they responded fully to our request to help and have fun."

Skyline Restoration President **John Tsampas** concurred: "The circle of business keeps turning and it's a win-win situation for everybody involved."

This year's golf outing showcased 34 groups that took to the fairways under blue skies in hopes of sinking a couple of birdie putts to claim the title of tournament champion, which **RKL Building Specialties** managed to achieve. The competitive nature of the event did not stop groups from supporting and cheering on each other as the

message of the event was clear- This is not about us, but rather, it is about those who are in need that may be ten, twenty, or even one thousand miles away.

Jessica Ramos, a key member of Skyline's crew, was moved by the outpouring excitement. "There's a sincere fulfillment that you get when you're part of a team that cares about something beyond itself. Skyline works so hard for the City – to bring everyone we work with together to give back to those in need makes you feel great. You know that you're really working for a purpose."

M&T Bank and **Sika Corporation** were the tournament sponsors.

Roy Vollmer of M&T Bank, was clear: "We are more than happy and proud to be a participant again this year. Skyline sees the big picture -- it's all about helping the community. Skyline helps raise families, it employs people. That's what they're about and what we're about at M&T."

"Sika was happy to be a part of this worthwhile effort to raise money for such important charities. The Golf

Continued on Page 8

SKYLINE'S SEVENTH ANNUAL GOLF CLASSIC RAISES RECORD TOTAL

Continued from Page 7

Outing was absolutely fantastic and first class all the way," said **Joe Vullo** of Sika. Sika's **Peter Wenz** said, "Sika and Skyline Restoration have worked together for many years restoring the buildings of Skyline Restoration and the many worthy charities from the early days to the new Skyline Charitable Foundation."

James Fenniman, AJ Gallagher Construction Practice, who has attended and sponsored each outing through his company, cheered Skyline's efforts saying, "This brings clients, vendors and charities together. It's a legacy event."

All were eager to applaud. **Jim Howe, Cowley Engineering**, called it "a beautiful outing close to July 4th to support our Wounded Warriors."

Spiro Markatos, Accura Restoration, was happy to support "a charity for the children" and join the "good networking and good camaraderie with clients – people with the same interests in the same profession."

The fun and excitement didn't end on the course, but rather picked-up full swing at the luxurious mansion overlooking the course where the cocktail, dinner and raffle events took place. With everyone in high spirits regardless of their performance on the greens, the event ended in a frenzy of drinks, food, prizes, and good conversation signaling the success of Skyline's Seventh Annual Golf Classic.

The achievements reached at this outing are a topic of inspiration for other's to participate in an effort to continue growing the event year after year. The relaxed atmosphere created a memorable night for

PHOTO: PEARL PERKNIS

Kaitlin Roarke (left), community relations, Smile Train, praised longtime supporter Skyline, saying, "This is a great high-energy event, a really fun way for people to come out, network and support cleft surgery at the same time. It's one of our biggest fundraisers in the area. Skyline has helped support close to 1500 surgeries which we perform in over 80 countries."

Christine Crowther (right) and **Jennifer Grubman** (center), representing The New York Center for Children which works for the prevention and treatment of child abuse, were glad to have Skyline's support. "It's a wonderful way to bring people together to raise funds and awareness for our cause and the other organizations," said Crowther.

all who attended and helped raise money to help communities around the world.

Matthew Yodel, Dewalt, said, "Skyline's a major player in the local community. It's important to show them support while they show us so much support."

Dave Parrillo with **Siplast** said, "You see the engineers and architects you may not otherwise see. It brings us all closer together."

For many reasons and for many people of all ages, from the New York metro area to the most remote areas across the globe, the Skyline Restoration Golf Classic 2015 was without a doubt the "best event ever!"

PHOTO: GEORGE CONSTANTINOU PHOTOGRAPHY

Veterans from VFW Post 1819 in Port Washington presented the Flag at the opening ceremony of Skyline’s Seventh Annual Golf Classic. John Tsampas (left), president, Skyline Restoration, next to Commander John Chalder.

To continue and expand our dedication to providing aid to local and international communities alike, Skyline Restoration established The Skyline Charitable Foundation last year to challenge others to join our efforts.

The Skyline Charitable Foundation serves as a channel for proceeds to be spread among multiple charities, giving supporters the freedom to allocate donations according to their preference, while introducing new causes and organizations to all. With its broadened horizon, the Skyline Charitable Foundation seeks to promote the well-being of individuals of all ages and backgrounds across the globe.

The ability to make a difference in people’s lives excites us at Skyline Restoration, and we are thankful for the kind support of so many. We trust that The Skyline Charitable Foundation will continue to grow and prosper by inspiring others to take action alongside us.

Our mission is simple – extend the reach of our influence beyond what is convenient, and encourage others to do the same.

PHOTO: GEORGE CONSTANTINOU PHOTOGRAPHY

African Soul-American Heart

Rygo Foss, Skyline Restoration’s legal counsel, introduced the company to ASAH through his late father, architect John Foss who was actively involved in the support of the cause and its work. Rygo has visited the students in the Sudan and plans to do so again in the future.

ASAH’s mission is to protect, educate, and empower orphans, primarily girls, from the Republic of South Sudan through primary school, secondary school, and beyond.

ASAH protects students from forced marriage at puberty which may save their lives and the lives of their children; educates students in school subjects and practical life skills to prepare them to take care of themselves and their families in the future; and empowers them to be leaders and to give back to their communities that they may help their troubled nation establish and maintain peace for all.

“Girls are sold into marriage at 14 and have no more chance for education and advancement. There’s also a great deal of civil strife in the area. Yet development of the school continues with ASAH’s help and I’m so glad that Skyline remains dedicated to the work,” said Rygo. For more information, visit africansoulamericanheart.org — (Photo (L-R): Rygo Foss, and John Kalafatis, CEO, Skyline Restoration Inc.)

SARA AWARDS

The **Society of American Registered Architects (SARA)**, founded in 1956 as a professional society aimed at promoting the architectural profession, has graciously recognized **Skyline Restoration's** work on the historic **6 Harrison Street** building by awarding the Silver Award of Honor to **Howard L. Zimmerman Architects PC**. Erected in 1884, the Building has had a rich history, namely as the previous home of the New York Mercantile Exchange before solidifying its place as a member of the Tribeca West Historic District.

Under the strict supervision of **The Landmarks Preservation Commission** and Howard L. Zimmerman Architects PC, Skyline Restoration successfully restored the described Building's "excessive deterioration" to include new brick and terra-cotta façade in accordance

with the restoration of the building's signature copper roof, clock tower, spire, and cupola.

This isn't the first acknowledgement Skyline Restoration has received for its work done on this magnificent building. Skyline was previously awarded the **North American Copper Award** for its copper work done on the building's roof and recognizable spire.

Skyline on ENR's List of Top Contractors 2015

Skyline Restoration is pleased to announce that, for the second consecutive year it has been ranked among ENR New York/New Jersey's Top Contractors for 2015.

For more information on the ENR listing, see http://newyork.construction.com/new_york_top_lists_construction_firms/2015/Top-Contractors/001-100.asp

Ecocapsule: A Tiny Home for Eco-Travelers

By **Charlotte O'Malley, EcoBuildingPulse.com**

Slovakia-based architectural studio **Nice Architects** has designed a sleek, small capsule fitted with all the essentials someone would need to go off the grid. "Even though small in size, each Ecocapsule comfortably houses two adults. Its efficient spatial layout allows you to enjoy convenience of household facilities in off-grid conditions. Built-in kitchenette with running water, toilet and hot shower are luxuries of a hotel room that are now also available in wilderness".

The Ecocapsule weighs 3,306 pounds, but its compact size makes it easy to transport. "Ecocapsule fits into a standard shipping container, and no special preparations and precautions are necessary to transport Ecocapsule worldwide. It can be shipped, airlifted, towed or even pulled by a pack animal."

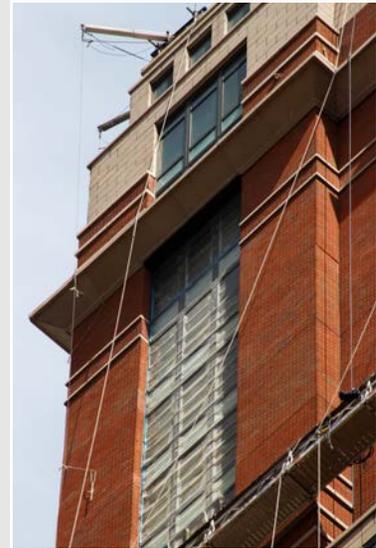

As of right now, the Ecocapsule is not yet in production--only functional prototypes have been produced. In the last quarter of 2015, Nice Architects will announce price breakdowns, and start accepting pre-orders. For more information, visit www.ecocapsule.sk

Park Laurel • 15 West 63rd Street, New York, NY

Skyline has undertaken a façade restoration project on yet another landmark building in Manhattan's Upper West Side. The Park Laurel located at **15 West 63rd Street** is a handsome luxury condominium apartment building, which boasts a beautiful red brick façade infused with white detail blending seamlessly into its very recognizable stepped-pyramid crown roof. The tower overlooking Central Park stands atop the landmarked West Side YMCA and former McBurney School, which displays a five-story Romanesque façade. **Kamen Tall Architects, P.C.** and **Skyline Restoration** have joined together to make the restoration a quick and sound endeavor, while making it a priority to maintain the building's distinguished look, which exhibits a sophisticated personality full of stories.

18th Annual Night Fishing Trip

Skyline Restoration's 18th Annual Night Fishing Trip (photo left) took place on Friday June 12, 2015. The eager crew set sail at 6pm and returned to shore at 12 am to City Island, New York. Aboard the Island Current, Skyline had an overall successful night of fishing with friends, family, and clients! Among others, Bill Pierrakeas (center) and Adnan Kaba (right).

Spartan Race at CitiField

This year, 18 Spartans from Skyline Restoration and Spring Scaffolding battled in the grueling Spartan Sprint held in Citi Field on May 8th 2015. The Spartan entry list included Ricardo Bueno, Elliot Castro, Jose Farez, Damian Farez, Rygo Foss, Tony Halasz, John Kalafatis, Cristian Lituma, Mihai Macioca, Michael Mirauti, Cristian Orellana, Adwin Samaniego, Angel Sanchez, Erick Sehnalek, Jake Toth, Emmanuel VanEiker, Alan Velez, and Guido Zhiminaycela. The fearless competitors raced 3 miles through Citi Field, while encountering 15+ obstacles scattered across maze-like course.
